

William Findlay

SECURITY RESEARCHER · SYSTEMS PROGRAMMER · KERNEL HACKER

☎ (613) 296-1240 | ✉ william@williamfindlay.com | 🏠 www.williamfindlay.com | 📺 [willfindlay](#) | 📺 [willfindlay](#)

Education

Carleton University

MASTER OF COMPUTER SCIENCE

Ottawa, Canada

Sept. 2020 – Present

- Current CGPA: 12.00 (A+) (Some course work completed during undergrad)
- Accelerated Master's Program
- Expected Graduation: September 2021

Carleton University

B.Sc. COMPUTER SCIENCE, HONOURS

Ottawa, Canada

Sept. 2015 – Apr. 2020

- CGPA: 11.05 (A)
- Accelerated Master's Program
- Graduated with High Distinction, Dean's Honour List
- Thesis: [Host-Based Anomaly Detection with Extended BPF](#)

Skills

Linux Kernel Kernel Hacking, Kernel Module Development, eBPF, XDP, bcc, libbpf

Systems Programming C, C++, Rust

Data Science Pandas, Numpy, Scipy, R

Research Applied Security, Operating System Security, Sandboxing, Intrusion Detection

Languages

Programming C, Python, Rust, C++, Java, Javascript, R

Markup \LaTeX , HTML, CSS

Human English, French

Academic Experience

Carleton University

RESEARCH ASSISTANT

Ottawa, Canada

Apr. 2019 – Present

- Member of the [CCSL/CISL](#) research group.
- Researching Extended BPF for runtime security implementations under the Linux kernel.
- Co-supervised by [Dr. Anil Somayaji](#) and [Dr. David Barrera](#).
- Designed and developed ebpfH, an anomaly detection system for Linux, using eBPF.
 - This work was the subject of my undergraduate [Honours Thesis](#).
- Designed and developed bpfbox, a process confinement tool for Linux, using eBPF.
 - This work was [published at ACM CCSW'2020](#).

Carleton University

TEACHING ASSISTANT, COMP3000 OPERATING SYSTEMS

Ottawa, Canada

Sept. 2018 – Present

- Nominee for the [Outstanding Teaching Assistant Award](#) in the 2018/2019, 2019/2020, and 2020/2021 academic years.
- Ran tutorial sessions for groups of 50 students.
- Took a leadership role to ensure tutorials proceeded smoothly.
- Held weekly office hours and workshops for students.
- Graded assignments and tests and gave appropriate feedback.
- Developed a [Discord bot](#) to help manage the class Discord server, used during the COVID-19 pandemic.
- Developed new tutorials which are now used each semester:
 - [Concurrency tutorial](#)
 - [Kernel memory management tutorial](#)
 - [eBPF tutorial](#)
 - [Rootkit tutorial](#)

Other Experience

Metro Ontario, Inc.

CUSTOMER SERVICE SUPERVISOR

Ottawa, Canada

Apr. 2014 – Jan. 2018

- Managed day-to-day operations in the front end service department.
- In charge of store payroll and accounting on a part-time basis.
- Exhibited superior customer service skills as required.

Awards and Nominations

ACCOLADES

2021	Nominee , Outstanding Teaching Assistant Award, Carleton University	Ottawa, Canada
2020	Nominee , Outstanding Teaching Assistant Award, Carleton University	Ottawa, Canada
2019	Nominee , Outstanding Teaching Assistant Award, Carleton University	Ottawa, Canada
2020	Recipient , Dean's Honour List, Carleton University	Ottawa, Canada
2019	Recipient , Dean's Honour List, Carleton University	Ottawa, Canada

SCHOLARSHIPS

2020	Recipient , Domestic Entrance Masters (\$2,000 CAD), Carleton University	Ottawa, Canada
2020–2021	Recipient , Departmental Scholarships (\$6,000 CAD / year), Carleton University	Ottawa, Canada
2020–2021	Recipient , Research Assistants (\$6,000 CAD / year), Carleton University	Ottawa, Canada
2020–2021	Recipient , Teaching Assistants (\$11,000 CAD / year), Carleton University	Ottawa, Canada
2015–2019	Recipient , Entrance Scholarship (\$2,000 CAD / year), Carleton University	Ottawa, Canada

Presentations and Invited Talks

Invited Talk, IBM Research – Security and Privacy

Virtual Event, USA

BPFBOX: SIMPLE PRECISE PROCESS CONFINEMENT WITH eBPF

Dec. 2020

- Invited guest speaker for the IBM Security and Privacy research group.
- Discussed my work on bpfbox, a process confinement mechanism for Linux using eBPF.
- Presented an overview of process confinement, eBPF, and its applications to security.

Conference Presentation, ACM CCSW'2020

Virtual Event, USA

BPFBOX: SIMPLE PRECISE PROCESS CONFINEMENT WITH eBPF

Nov. 2020

- Presented my work and accompanying paper on bpfbox, a process confinement mechanism for Linux using eBPF.

Seminar Presentation, CCSL/CISL Seminar

Ottawa, Canada

BPFBOX: SIMPLE PRECISE PROCESS CONFINEMENT WITH eBPF

Oct. 2020

- Speaker at a seminar for the CCSL/CISL research group.
- Discussed my work on bpfbox, a process confinement mechanism for Linux using eBPF.
- Presented an overview of process confinement, eBPF, and its applications to security.

Lightning Talk, First Annual eBPF Summit

Virtual Event, USA

BPFBOX: SIMPLE PRECISE PROCESS CONFINEMENT WITH eBPF AND KRSI

Oct. 2020

- Invited to give a lightning talk for the [inaugural eBPF summit](#), hosted by Cilium.
- Gave a brief talk about my work on bpfbox, a process confinement mechanism for Linux using eBPF.

Seminar Presentation, CCSL/CISL Seminar

Ottawa, Canada

EXTENDED BPF PROCESS HOMEOSTASIS

Apr. 2020

- Speaker at a seminar for the CCSL/CISL research group.
- Discussed my work on ebpH, an anomaly detection system for Linux using eBPF.
- Presented an overview of anomaly detection, eBPF, and its applications to security.

CONFERENCE PROCEEDINGS

- [1] William Findlay, Anil Somayaji, and David Barrera. “bpfbox: Simple Precise Process Confinement with eBPF”. In: *Proceedings of the 2020 ACM SIGSAC Conference on Cloud Computing Security Workshop. CCSW’20*. Virtual Event, USA: Association for Computing Machinery, 2020, pp. 91–103. doi: [10.1145/3411495.3421358](https://doi.org/10.1145/3411495.3421358).

TECHNICAL REPORTS, ARCHIVES, AND THESES

- [1] William Findlay. “Host-Based Anomaly Detection with Extended BPF”. Honours Thesis. Carleton University, 2020. URL: <https://www.cisl.carleton.ca/~will/written/coursework/undergrad-ebpH-thesis.pdf>.

Open-Source Software

CREATOR/MAINTAINER

BPFContain

EXPERIMENTAL CONTAINER SECURITY MECHANISM USING EBPF

- Designed and implemented a container security framework using eBPF programs and LSM hooks.
- Tech stack for this project includes Rust, libbpf-rs, and eBPF.
- BPFContain is the subject of ongoing research and development, and will be the topic of my 2021 Master’s Thesis.
- Full source code available: <https://github.com/willfindlay/bpfcontain-rs>

bpfbox

EBPF-BASED PROCESS CONFINEMENT MECHANISM

- Designed and implemented the first eBPF-based policy enforcement engine and a high-level policy language for process confinement.
- This work was [published at ACM CCSW’2020](#).
- Full source code available: <https://github.com/willfindlay/bpfbox>

ebpH

EBPF-BASED INTRUSION DETECTION SYSTEM

- Designed and implemented an intrusion detection system for Linux based on eBPF.
- Establishes per-executable system call profiles in order to establish normal behaviour and detect anomalies.
- Full source code is available: <https://github.com/willfindlay/ebpH>.

CONTRIBUTOR

bcc

EBPF PROGRAMMING FRAMEWORK FOR PYTHON

- Regular contributor to a large open-source project.
- Implemented the following major features:
 - Support for the ringbuf eBPF map
 - Enhanced support for LSM probes
 - Python support for stack and queue eBPF maps
- Full source code is available: <https://github.com/iovisor/bcc>.

libbpf-rs

RUST IMPLEMENTATION OF LIBBPF

- Implemented several major features to an open-source Rust project:
 - Support for the ringbuf eBPF map
 - Enhanced support for LSM probes
 - Bugfixes and general API improvements
- Full source code is available: <https://github.com/libbpf/libbpf-rs>.
